

Kedebideri - Character Set Support

The Beria Erfe script has received [provisional codepoint assignments](#) by the Unicode Technical Committee. The script has not yet been formally accepted and approved for a future version of the Unicode Standard. The Kedebideri font is using the provisional codepoints, but those codepoints can always change. Should those codepoints change, this font would be re-released with the new encoding. Documents would then need converting to use the new codepoints.

The Kedebideri font supports the characters in the Beria Erfe block.

Supported characters

The following character ranges are supported by this font:

Unicode block	Kedebideri support
Beria Erfe (16EA0..16EDF)	✓
Codepage 1252 (Western) ¹	✓

A selection of characters from the General Punctuation block, such as various-sized spaces, are also supported; a utility such as [SIL ViewGlyph](#) can be used to examine the exact repertoire of this font.

¹Inclusion of basic Latin repertoire is provided as a convenience, e.g., for use in menus or for displaying markup in text files; these fonts are not intended for extensive Latin script use.
