

Kedebideri - Design

The Kedebideri font supports the Beria Erfe script which is used for the Zaghawa Beria language of Sudan and Chad.

This font was initially designed by a volunteer who chooses to remain anonymous, in cooperation with SIL Global and the Mission Protestante Franco-Suisse au Tchad.

The Latin glyphs were imported from Source Sans Pro at 103% and a weight of CSS 360 for Regular and CSS 670 for Black.

Six weights for this typeface family are included:

- Kedebideri Regular
- Kedebideri Medium
- Kedebideri SemiBold
- Kedebideri Bold
- Kedebideri ExtraBold
- Kedebideri Black

Type Samples

Type samples showing some of the inventory of glyphs can be found here: [Kedebideri Type Sample](#).

One example of some text is shown below.

ጽሑፍ ርዕደ ገጽ ፲፭ ለጽሑፍ ይገኛል፡፡ (Regular)

[illegible][illegible]

ጸሐፊዎች ስም (Bold)

[illegible][illegible]

Kedebideri Sample - Six weights
